New York City: Accessibility to Schools from Affordable Housing

Jessie Fujii
CRP 3850

Introduction

Research Question: Is affordable housing in NYC located in areas accessible to schools?

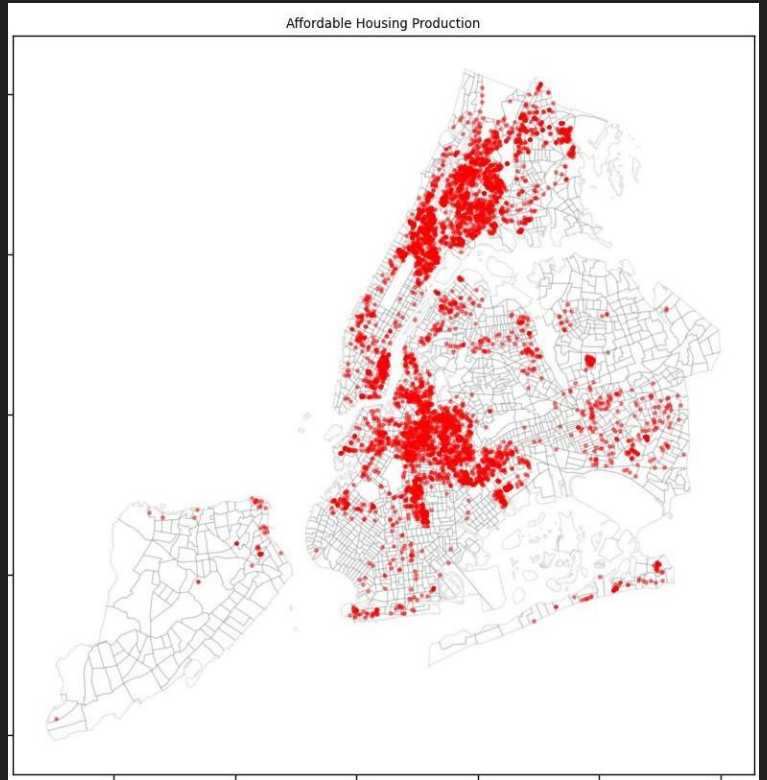

Methodology:

- Data is collected from NYC Open Data
- Geocoded based on longitude and latitude if no geometry data was already provided

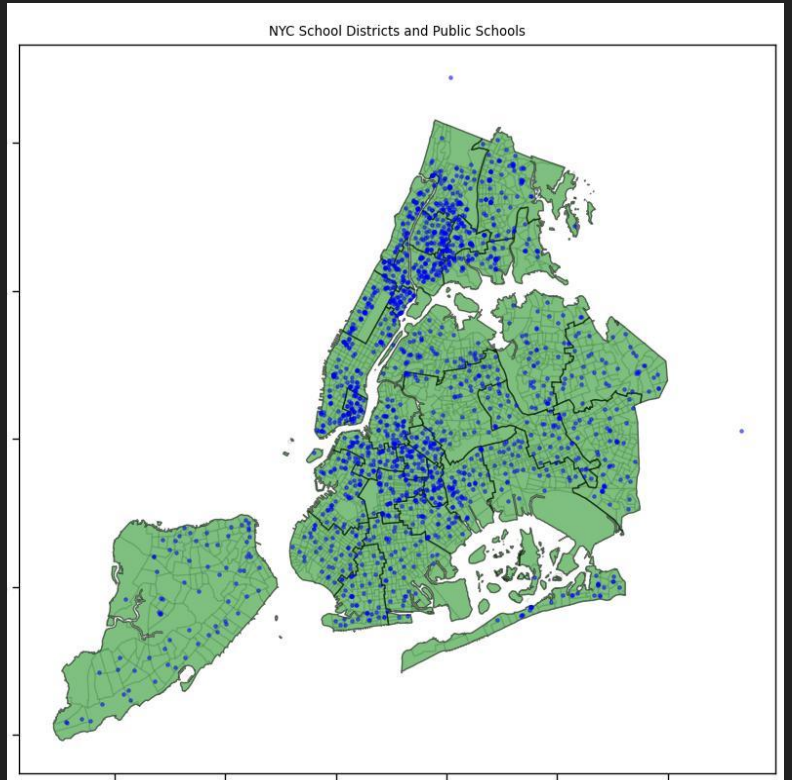

Analysis:

- Moran’s I Analysis with K-nearest neighbor weights

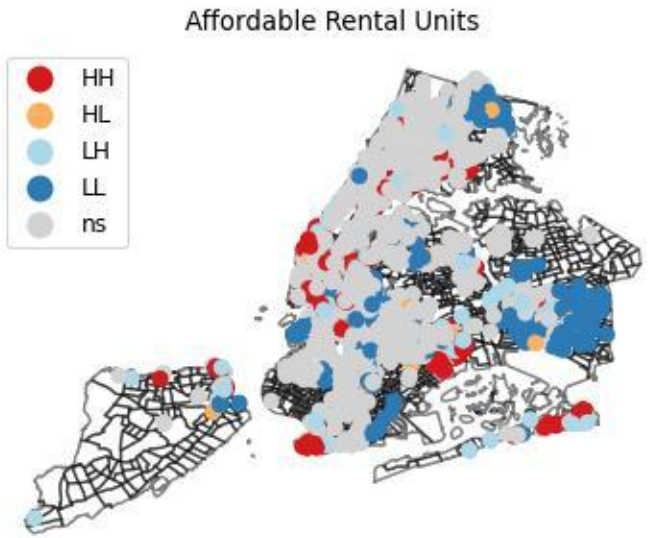

Affordable Housing Developments

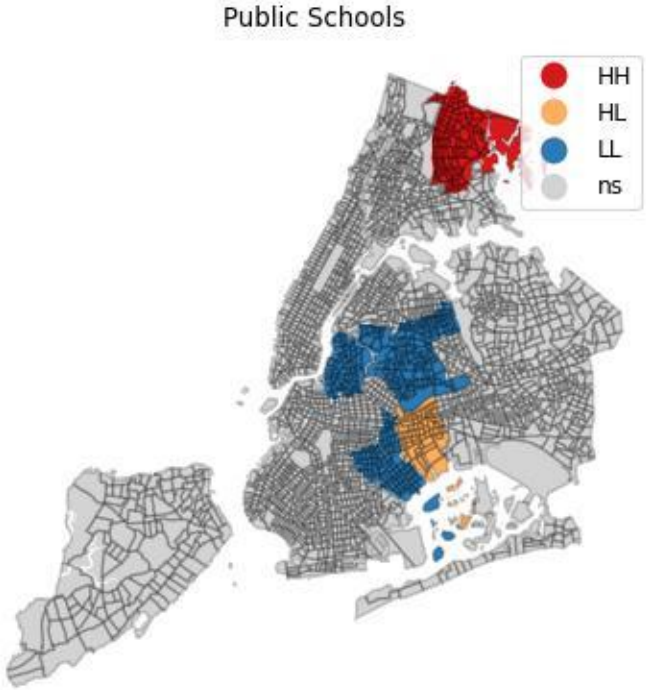

School Locations & Districts

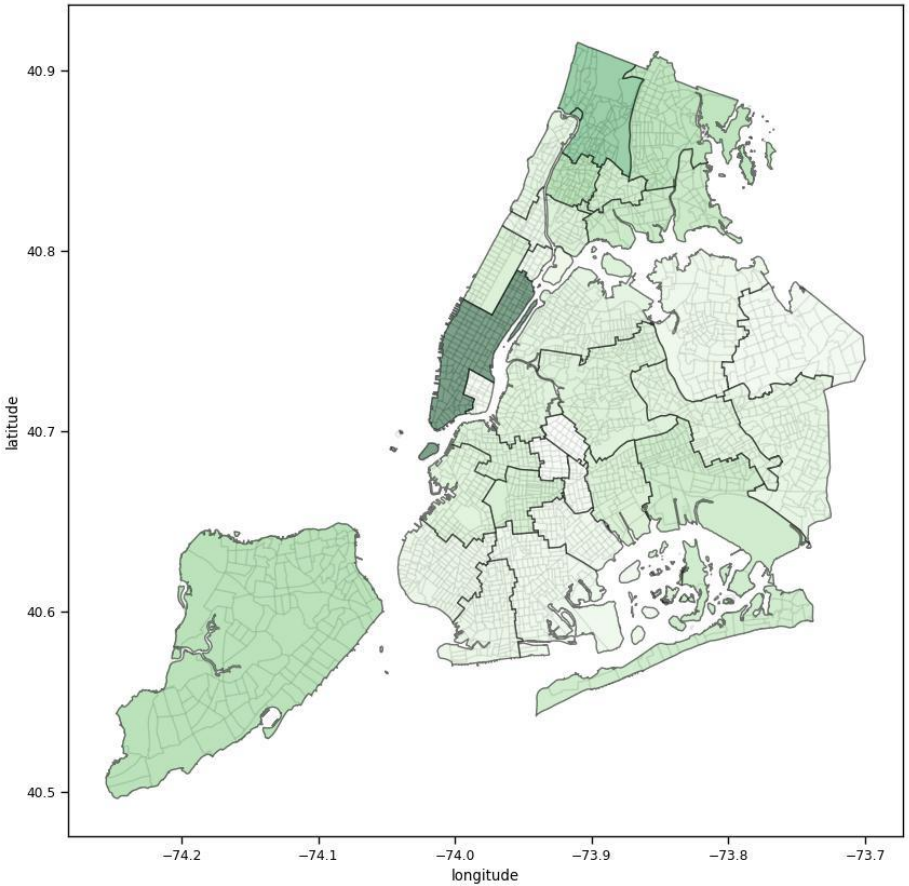

Spatial Autocorrelation of Affordable Rental Units & Public Schools by District

The Distribution of Public Schools

- Concentration of schools in Manhattan
- Lower population density in other school districts

Conclusion

Results:

- Affordable housing location seems to not be related to locations of public schools

Limitations:

- Other factors that influence the location of affordable housing need to be explored
- The data varies in how recently it was collected
